Introduction

1. The Master in Music Performance is a structured course normally comprising two years' full-time study.

In designing this programme the Academy has allocated to the student a significant amount of individual tuition from the instrumental/vocal teacher. The number of students admitted to the course is small and therefore will only be open to graduates of proven excellence. The RIAM provides the necessary vocal, instrumental and academic skills to provide a postgraduate degree of distinction in musical performance.

The primary emphasis of the course is on practical studies including both solo and ensemble work. These studies are supported by classes in which the student is encouraged to pursue his/her own study of a related musical subject. Seminars in performance practice, other specialist music topics and Masterclasses will be given by members of the Academy staff as well as other distinguished national and international musicians.

Students who successfully complete the first year of the course and do not continue to year two are awarded a Graduate Diploma of Music in Performance [60 ECTS credits]. Successful completion of year 2 of the course leads to the award of the Master in Music Performance [120 ECTS credits]. The Graduate Diploma of Music in Performance is not awarded to those who complete the Master in Music Performance.

Practical examinations and written and practical assessments will be held in each year of the course. Every Masters student must pass all Practical components (Recital Examinations) which reflects the emphasis on Practical Performance skills in this Degree. Academic Module 4 gives the Masters student the option of choosing one from Dissertation, Composition, or Music Technology, giving the student the opportunity to support their practical skills in a bespoke way and making an original contribution to research and practice in their chosen discipline.

2. Rationale

The RIAM Master in Music Performance Degree had its first intake in 1996. Since then many of Ireland’s most successful professional musicians have completed this programme. Graduates include Ailish Tynan, Claudia Boyle, Colm Byrne, Yue Tang, Alexander Bernstein, Celine Byrne, Ann Soo Jung. These names reflect a student body which includes international prize-winners and those with emerging international careers.

With the Master in Music Performance Degree the Royal Irish Academy of Music provides a qualification of prestige and excellence in musical performance that is not otherwise available in this country.

Over the last twenty years the standard of education of musical performers in Ireland has increased to a level comparable with the best available anywhere in the world. The introduction of undergraduate degrees in performance has given young performers the possibility of continuing to study their instrument at third level without necessarily leaving the country, as was the case heretofore. Because of the rise in standards and more Irish performers living abroad have been encouraged to return to live in Ireland and teach at institutions such as the RIAM. In addition, the international reputation of RIAM and its proven track record in producing graduates that have gone on to significant professional careers continues to attract a high calibre of overseas students. As a result, there is a steady increase in applications from abroad to study at the RIAM.

One compelling benefit to the accreditation of this Master’s degree by TCD is the opportunity it provides for the RIAM to contribute to the activities and programmes in the TCD School of Drama, Film and Music, and for RIAM to benefit from this relationship in turn. To name some immediate collaborative opportunities, the RIAM Masters student will be able to perform the music compositions of the TCD student and staff composer; the RIAM Masters singers and instrumentalists can combine forces with the technical theatre students of the LIR to produce opera performances; and RIAM faculty are in a position to teach opera score reading skills to the LIR’s next generation stage managers.

In planning for future opportunities for collaboration, we propose that a working group which includes representatives from the RIAM and the School of Drama, Film and Music will form, to plan joint initiatives and facilitate developing shared projects in appropriate and fruitful areas.

3. Governance structure

3.1 RIAM Board of Governors

The RIAM Board of Governors is responsible for the governance and management of the Academy and for the administration of the endowments. The Board consists of Vice Presidents, the Director and Governors representing the members of the Academy, the endowments, Dublin City Council, the Academic Board and staff.

3.2 RIAM Board of Studies

The RIAM Board of Studies is the Academic Board of the Academy. Subject to the supreme control of the Governors,
this Board has charge of all matters directly appertaining to education in the Academy. The Board meets on a weekly basis during the Academic year and minutes of these meetings are submitted to the Board of Governors for approval.

3.3 RIAM Heads of Faculty

Five Heads of Faculty are appointed from the teaching staff. The faculties are broken into: Keyboard, Vocal Studies, Wind, Brass and Percussion, Strings and Musicianship. Heads of Faculty represent their faculties’ interests at RIAM Board of Studies meetings and also assist the Director in setting and implementing strategic plans for the RIAM.

3.4 Governance structure between TCD and RIAM

The governance structure of the validated course will be via the RIAM Associated College Degrees Committee. RIAM plans to integrate the RIAM Associated College Degrees Committee by having a Committee representative on the Examination Board.

4.3 Admission Requirements

**Qualifications or equivalent** - Applicants will normally hold a BA in Music Performance (2.1 or higher) or a degree of similar standing whereby music performance is a major component from a recognised academy, conservatoire or university or an advanced qualification in recital or music performance from a recognised academy, conservatoire or university. However, applicants who can demonstrate a high level of ability in music performance may be accepted even if their undergraduate degree is from another discipline, or in recognition of demonstrable professional experience with permission of TCD Senior Lecturer.

**Competence in the English language** - all classes/lectures/seminars are conducted through English. Students whose first language is not English and who have not been educated through the medium of English must present one of the qualifications in the English language as denoted on TCD’s website.

**Note:**
- Students whose standard is at IELTS 5.5 or 6 or equivalent may be made a conditional offer, and will be required to take part in TCD's 8 week IELTS Pathway Programme (or similar programme) prior to taking up the place in September. They must be certified at IELTS 6.5 by the time of starting the degree. Failure to reach 6.5 means that the student must relinquish or defer their offer.

**Applications** - All prospective applicants must submit online by 1st December the following documents:

- Completed online application form.
- Pay online the relevant non-refundable application fee.
- An unedited recording of not less than 15 minutes
- A repertoire list of previously performed works
A detailed Curriculum Vitae including details of performances, examinations and course taken to date
Transcripts of BA in Music Degree, or equivalent
Proof of competence in English where necessary for those applicants whose education is not through the medium of English
Written recommendations from two musicians, one of whom may be the applicant’s teacher, confirming the suitability of the applicant for the course
A personal statement may be included. Applicants may choose to indicate why they wish to undertake a Master of Music in Performance degree, what they hope to achieve and why they specifically wish to study at the Royal Irish Academy of Music
Nominate their chosen Academic Major Elective and submit the relevant portfolio/documentation for their chosen Elective from:

**Dissertation**
- Proof of an acceptable level of prior academic writing via submitted paper(s) for approval by the Head of Musicianship
- Shortlist of Dissertation topic options (at least 3 topics options) and a short description detailing the reasoning and direction of research angle for each one
- English as a first language or minimum 90 points internet TOEFL score with written score of 21

**Music Technology**
- ECDL certification or an "equivalent knowledge" exemption, established by a meeting with the course lecturer
- An appropriate background at undergraduate level or otherwise demonstrated level of ability appropriate to the course demands

**Composition**
- Prior track record in composing original works demonstrated by submission of composition portfolio of no fewer than three works
- An appropriate background at undergraduate level in method and research skills of music theory or music analysis

4.4 Audition Procedures

- Auditions are usually held in person in late January. However, overseas applicants may seek permission to audition by DVD. Candidates will be interviewed immediately after their performance and there is no written examination.
- Candidates must ensure that the quality of this unedited DVD is sufficient for the panel to make a judgment. Poor quality DVDs will result in the panel being unable to make a decision.

**The audition/interview panel** will normally consist of:
- The Director or her/his nominee
- Head of Keyboard Faculty or his/her nominee
- Head of Musicianship Faculty or her/his nominee
- Head of Vocal Faculty or her/his nominee
- Head of String Faculty or her/his nominee
- Head of Wind, Brass and Percussion Faculty or his/her nominee
- The relevant prospective teacher may attend auditions but do not form part of the panel

Applicants will be selected on the strength of their performing ability and on the basis of written application with only the best-qualified applicants accepted. Short-listed applicants will be notified of the day and time of their audition and interview.

**Performance audition** - all successful applicants called for audition will be required to perform a balanced and stylistically contrasting programme of at least 30 minutes for the audition Panel. The panel may, at their discretion, require the applicant to sight-read a piece of suitable difficulty. Applicants must provide their own Accompanist if required.

**Interview** - the interview will normally take approximately 10 - 15 minutes but may take more or less time than this depending on what the panel deem necessary. Applicants can be asked general questions such as why they applied for the course or what they hope to achieve through taking the course, to more specific questions such as particular technical issues they might wish to work on, repertoire they might like to specialise in, and more.

**Audition/Interview Results** - the maximum number of applicants who are accepted onto the course in any one year is normally six. This number may be exceeded in the second year of the course if applicants with an advanced qualification are admitted alongside students advancing from Year 1 in the normal manner. Successful applicants
who are offered a place on the programme are notified in writing and must adhere to the deadlines stated in the letter of offer or the offer will lapse and the place will be re-assigned.

4.5 Administrative support
The RIAM has an administration team in place to support its existing programmes, the Bachelor of Music in Education, the Bachelor in Music Performance, the Bachelor in Music Composition, the Diploma in Teaching and Performance, the Access Programme, the Diploma in Community and Group Teaching. Administration support includes admissions, examinations and student records.

4.6 Accommodation
The programme will be delivered by RIAM staff at the RIAM premises in Westland Row. While we do not have student accommodation facilities our position in the centre of Dublin means that we are served by a wide number of transport options, particularly the bus, LUAS and DART.

5. Academic quality assurance

5.1 RIAM Board of Studies
The Board of Studies has overall responsibility for assuring the quality of all programmes delivered by the RIAM and are informed of all recommendations of the Master in Music Performance Degree Committee. Part of the review to ensure the programme is meeting the needs of students and tutors, is a self-review including student feedback and external review process. The Master in Music Performance Course Committee will report to the RIAM Board of Studies, the RIAM Associated College Degrees Committee and to the Board of Governors on a regular basis.

5.2 Evaluation/Student feedback
Student feedback on module content, assessment and teaching is sought directly from students. A questionnaire which is disseminated to students in a hard copy format at the end of each Academic Year is collected via an anonymous hand-in point in the General Office in RIAM.
Feedback from questionnaires is collated and presented to the Course Committee for consideration. Recommendations arising from this feedback are made to the course teaching staff. Implementation of such changes will be the responsibility of teaching staff, overseen by the Course Committee. The secretary of the Course Committee will report to the Board of Studies and, from this committee, reports will be issued to the Governing Body of the RIAM and to the RIAM Associated College Degrees Committee about the implementation of these changes.

This questionnaire is supplemented by formal monthly group feedback sessions with RIAM staff and both sets of data are added to the on-going quality assurance processes for this degree.

5.3 Role of External Examiners
All programmes offered by the RIAM have programme-specific external examiners engaged. These will comprise:
- An overall External Examiner
- A panel of specialist External Examiner to be appointed for each instrumental/vocal practical examination, subject to the approval of the RIAM Associated College Degrees Committee.

Procedure for the Appointment of overall External Examiners
- The Master in Music Performance Course Committee will nominate an overall External Examiner for approval to the RIAM Associated College Degrees Committee.

5.4 Student services and facilities
The Georgian house at Dublin’s No. 36 Westland Row is a building of great architectural beauty and importance and together with the two adjoining houses provides an extremely pleasant and suitable environment in which to study and teach. Facilities include the 150-seater Katherine Brennan Hall, a recital room which can seat sixty, a student common room, practice rooms, free Wi-Fi, use of Academy computers with own login and personal password, a recording studio and a large number of teaching rooms. The city-centre location, beside Pearse Street DART Station and numerous bus services, makes it one of the country’s most accessible music schools.

Library
The RIAM library provides access to the electronic and printed research resources required for Masters studies. As well as providing an Induction Day tour for new students, the library offers a series of tutorials on research and library skills, focusing on research resources, database searching, and electronic journals and sourcing and evaluating scholarly resources on the internet.

General Office
The Royal Irish Academy of Music has an efficient, well-staffed administrative Office to support students in relation to admissions, registration, examinations and records. The Office is also responsible for organising an Induction Day for new students. On Induction Day [which is held at the RIAM] students complete the necessary registration documents and will be introduced to RIAM staff - the Director, and other key personnel. Information regarding
commencement of lessons and academic studies will be available on this day. New students will be given a tour of the RIAM Library and its facilities.

Use of computers
Valid usernames and passwords will give students’ access to Moodle, the Internet, MS Word, music technology software and personal folders on the Student Server (RIAMTLS) to store course-related work, created on PCs [20] which are connected to the Student Network and installed in the Library and in the Computer Room.

6. Course Committee

6.1 Structure of Course Committee
The Master in Music Performance Course Committee is the forum where all questions of policy, academic integrity and future curriculum development of the programme are discussed and recommendations will be formulated. The committee is responsible for designing module content, supervises student admissions, progress and examinations. It also nominates the External Examiners and External Specialists. The Course Committee reports to the Board of Studies and to the Board of Governors on a regular basis and consists of the following twelve ex officio members:

- Director or her/his nominee
- Chairperson of the Course Committee [elected from the Course Committee each Academic Year]

In addition, Lecturers of registered students on the Master in Music Performance Degree are automatically members of the Course Committee.

The Course Committee will convene at least four times annually. The committee will be chaired by a member of the Course Committee who is nominated and elected each Academic Year.

In Academic Supporting Study electives students, while opting for one component, are free to attend lectures in other components offered if they feel that these will aid their completion of their stated option e.g. composition students may wish to attend some lectures in Music Technology. Equally, should the relevant lecturers and/or the Course Committee deem it necessary, students may be required to attend supplemental lectures in addition to their stated electives in order to complete their course successfully.

Students must choose **one** of the following:-

**Year 1:** The total hours devoted to the chosen option must not be less than 20 hours during the Academic year.

- Dissertation
- Music Technology
- Composition

**Year 2:** Continuation of year 1

- Dissertation
- Music Technology
- Composition

**Module 5: RIAM Holistic [1 & 2] [Optional]**

While it is not compulsory for Master students to attend RIAM Holistic seminars, which are geared towards skills which will inform a musician's professional life in a range of situations it is recommended. Subjects included are: Feldenkrais, Yoga, Performance Psychology, Career Strategy.

**Feldenkrais**

The Feldenkrais Method is designed to improve movement repertoire aiming to expand the use of self through awareness in order to reduce pain or limitations in movement and promote general wellbeing. These lessons are designed to provide concrete information for attending to and learning about the physical experience associated with movement. Each session focuses on a different part of the body and related physical experiences to include Breathing, Jaw, Arms and Shoulders, Balance and Postural Alignment.

**Yoga**

This module will encourage students to integrate Yoga into their practice routines. Increased awareness of how to use the body to allow for good posture and ease of movement while performing will help avoid overuse injuries and encourage freedom of expression.

**Performance Psychology**

This section of Professional Practice focuses on the psychology of performance. It aims to raise awareness of the necessity for emotional and mental well-being in the quest to reach peak performance.

**Career Strategy**

Students are taken through an introduction to taxation, concert planning and promotion, biography writing, CV writing, mock auditions, leadership skills and interviews.

### 7.8 Integration and linking across Year 1 and Year 2

Year 1 and 2 of the Masters programme will involve incremental learning, with each module building upon and linking with the previous section.

4. **Rationale and Aims**
   **Rationale**
   A generous amount of time has been set aside for intensive study of the student's instrumental discipline. These lessons, delivered on a one-to-one basis, are aimed to bring students to a high level of appropriate technical and artistic skill.

   Over the life of the course, the repertoire appropriate to the instrument and the student's own interests will be covered in depth, and this intensive study will be reflected in the student's programmes presented for examination. Such programmes must be approved by the student's teacher and the Course Committee and in all years must be balanced and display contrasting styles and periods.

   **Aims (Overall)**
   - To achieve productive practice and independent learning
   - To develop confidence in complex and specialised stylistic and interpretive issues
   - To develop a student's study of a variety of demanding repertoire
   - Perform with a sense of communication and artistic value

- Full (100%) attendance is compulsory for all RIAM ensembles. Performance projects may include weekends and evening hours.
- Except where there is duly certified or other approved reason, students who miss a rehearsal or performance will be removed from the ensemble for that specific performance project and will bear a 10% deduction of their overall performance mark (weighted at 60% of their year’s total marks).
- A further absence in a further performance project will bear an additional 10% deduction and the student will again be removed from that project.
- A third absence will result in a student failing this module.

5. **Rationale and Aims**
   **Rationale**
   **Dissertation**
   The principal objective of the Masters Dissertation is to demonstrate original scholarship, which, together with an appropriate critical analysis of relevant literature, will contribute to the general knowledge of the field of music and music-related scholarship. The subject matter must be treated in depth to a length of approximately 12,000-15,000 words which must be submitted in year 2. Year 1 students must submit an essay of between 3,000-5,000 words related to the Dissertation Topic and in addition, a document of approximately 2,000 words detailing the research undertaken during Year 1 and a research plan/timeline for the remaining work to be accomplished prior to final submission.
   **Music Technology**
   The principle objectives of the Masters Music Technology elective are to contribute to the field of Electro-Acoustic/Acousmatic Composition (EA/AC) by creating original artistic work via the submission of a digital media portfolio of a minimum of 50-60 minutes in length across the two years of the degree. In addition, students will contribute a critical analysis of the work in the field via a detailed written commentary on the creative process involved in said portfolio its place within the field of EA/AC, and the final artistic result. Year one students must submit a research based commentary of approximately 4,000 words in year 1 and an additional 4,000 words in year 2 totally approximately 8,000 words across the two years of the degree.
   **Composition**
   The module enables students who have already shown aptitude for composition to pursue more ambitious compositional aims involving original work for solo instrument/voice and more extended instrumental/vocal groupings. This elective requires students to compose a substantial portfolio of works to reach approximately 50-60 minutes of music across the two years of the degree, under the supervision of a composition lecturer. In addition, students must produce a research based paper placing their own work in
the context of 20th/21st century music. The paper should emphasise the relevance of a wider musical context to their own work, drawing on theoretical/analytical methodologies, in a future-oriented manner.

Year one students must submit a research based paper of approximately 4,000 words in year 1 and an additional 4,000 words in year 2 totally approximately 8,000 words across the two years of the degree.

**Aims**

**Dissertation**
- To identify and describe appropriate methodologies for research projects
- To select and choose a Dissertation topic appropriate to the degree focus and/or the musical background of the student
- To complete a thorough literature review on the topic chosen
- To present an end of year essay of approximately 5,000 - 7,000 words which identifies the research topic to be studied in year 2, and outlines the research methodology and review literature which will be used in the course of the investigation

**Music Technology**
- The study of the major techniques used in Electro-Acoustic/Acousmatic Composition
- The study and use of music technology software appropriate to said techniques
- To gain an understanding of the historical developments in the field of Electro-Acoustic/Acousmatic Composition via critical analysis of the masterworks of the 20th and 21st century
- To submit a digital media portfolio of a minimum of 25-30 minutes in length and a detailed research based written commentary of the artistic process involved and justification of its place within the field of EA/AC)

**Composition**
- The study of the major techniques used in Composition in the 20th and 21st centuries
- To apply these techniques to the creation of original compositions
- To submit a portfolio of a minimum of 25-30 minutes in length or original work in solo and extended groupings
- To commence preparing a research based paper which will reach approximately 8,000 words at the end of year 2, placing their own work in the context of 20th/21st century music. The paper should emphasise the relevance of a wider musical context to their own work, drawing on theoretical/analytical methodologies, in a future-oriented manner.

7. Course Content and Syllabus
Dissertation
In year 1 the course will cover an introduction to research methodology practices, the development and implementation of a research plan, submission of various parts of the Essay at deadlines set between the student and supervisor, several drafts of the Essay, oral presentation of work in progress at the postgraduate Dissertation seminar in preparation for a final Dissertation submission in year 2. For further guidance see Dissertation Handbook [to follow].

Music Technology
A typical Music Technology course is divided into three 10-week sessions. Each session will look at one particular topic in-depth with an assignment to follow. Topics covered have ranged from Synthesis Design via Reaktor/Absynth, Composition for Multi-Channel Speaker Array, Sound Design and Foley for Film, Composition through Field Recording through Live Electronic Processing via MaxMSP, Interactive Installation Design and Composition for Mixed-Media.

Content is the subject to change due to the acquisition and continual release of new software packages and emerging artistic trends in the industry.

Composition
A folio of works which will usually be five in number by the end of year 2, but allowance is made for size and scope of individual projects. A student who wished to write a symphony or opera, for example, would carry a reduced requirement for the remainder of the folio. The initial preparation of a written commentary which will reach 8,000 words by the end of year 2, dealing with technical and aesthetic aspects of the folio and placing their own work in the context of 20th/21st century music. The paper should emphasise the relevance of a wider musical context to their own work, drawing on theoretical/analytical methodologies, in a future-oriented manner.

8. Teaching and Learning Methods
Dissertation
Individual support on all elements of the course content described above provided by the primary supervisor
Research methodology sessions provided by the RIAM librarian

Music Technology
Topics are covered over three 10-week segments:
The first week will typically introduce students to the area of study through the use of historical and contemporary examples from leading figures in the field

Weeks 2-8 (approximately) will deal with the software packages required to complete an assignment in the topic area for that module with a specific focus on and critical analysis of the techniques used in the masterworks on the 20th and 21st century that are particular to that topic.

These classes are a mixture of step-by-step instruction and tutorial-based activities designed to familiarise students with the software and the aesthetic discipline of the subject

Weeks 8-10 (approximately) are tutorial weeks where students begin work on their assignment and may present work in progress for initial feedback or request particular clarification of certain principles

Composition
Teaching is by individual tutorial. Work in progress is continuously assessed and feedback given. In addition, students are invited to take part in workshops by RIAM students and visiting ensembles and the Kirkos Ensemble.

9. Required Equipment and Resources

These lessons are designed to provide concrete information about the physical experience associated with movement. Each session focuses on a different part of the body and includes breathing, jaw, arms and shoulders, balance and postural alignment.

   **Yoga**
   Yoga is a Hindu spiritual and ascetic discipline, a part of which, including breath control, simple meditation, and the adoption of specific bodily postures, is widely practised for health and relaxation. It has proven to beneficial to our health and well-being.

   **Improvisation [Not compulsory for Vocal students]**
   Students are given note rows and rhythms as building blocks for learning to make music away from the score across a range of genres. Students will be encouraged to improvise as soloists and in groups.

   **Performance Psychology**
   This section of Professional Practice focuses on the psychology of performance. It aims to raise awareness of the necessity for emotional and mental well-being in the quest to reach peak performance.

   **Career Strategy**
   Students are taken through an introduction to taxation, concert planning and promotion, biography writing, CV writing, mock auditions and interviews. Special lectures exploring the development of leadership skills for the performing musician are incorporated into this component.

5. Rationale and Aims
   Rationale
   A generous amount of time has been set aside for intensive study of the student's instrumental discipline. These lessons, delivered on a one-to-one basis, build on the work done in year one and are aimed at bringing students to a high level of appropriate technical and artistic skill.

   In year 2 more demanding repertoire appropriate to the instrument, and the student's own interests, will be covered in depth. This intensive study will be reflected in the student's programmes presented for examination. Such programmes must be approved by the student's teacher and the Course Committee and in all years must be balanced and display contrasting styles and periods.

   Aims (Overall)
   • To achieve productive practice and independent learning
   • To develop confidence in complex and specialised stylistic and interpretive issues
   • To develop a student's study of a variety of demanding repertoire

5. Rationale and Aims
   Rationale
   Chamber music forms a core part of many performing musicians’ lives. The ability to perform in a small group requires different skills to those of solo repertoire and the demands of orchestral playing. It requires all the technical and musical competence necessary for other repertoire, but in addition demands deep listening and coordination between complex and interwoven parts. It is expected that in year 2, students will explore more complex repertoire.

   Aims
   - To develop students’ musical awareness for chamber music performance
   - To establish the foundation for productive practice in a small group
   - To encourage students to explore a wide variety of chamber music repertoire

6. Learning Outcomes
   (Programme learning outcome relevant to this module)
   Upon successful completion of the Master in Music Performance Degree, the students should be able to:
   - Demonstrate critical understanding of the different demands of a range of performance repertoire from duo recital and chamber music to large ensembles, through the assimilation and public performance of a range of demanding musical repertoire

   On successful completion of this module, the student will be able to:
   - Demonstrate an expanded level of critical understanding of the artistic and interpretive challenges of chamber music repertoire through performance
   - Perform this repertoire with a sense of communication and value
   - Demonstrate practice and rehearsal techniques appropriate to successful chamber music performances in coaching sessions, rehearsals and performances
   - Demonstrate an expanded level of leadership, team work and negotiation in relation to small ensemble work through rehearsal and performances

5. **Rationale and Aims**
   **Rationale**
   **Dissertation**
   Building on the knowledge gained in research methodology in year 1, the principal objective of the Masters Dissertation in year 2 is to complete a Dissertation of original scholarship, which, together with an appropriate critical analysis of relevant literature, will contribute to the general knowledge of the field of music and music-related scholarship. The subject matter must be treated in depth to a length of approximately 12,000-15,000 words.

   **Music Technology**
   The principle objectives of the Masters Music Technology elective are to contribute to the field of Electro-Acoustic/Acousmatic Composition (EA/AC) by creating original artistic work via the submission of a digital media portfolio of a minimum of 50-60 minutes in length across the two years of the degree, and to contribute a critical analysis of the work in the field via a detailed research based written commentary of approximately 8,000 words on the creative process involved in said portfolio, its place within the field of EA/AC, and the final artistic result.

   **Composition**
   The module enables students who have already shown aptitude for composition to pursue more ambitious compositional aims involving original work for solo instrument/voice and more extended instrumental/vocal groupings. This elective requires students to compose a substantial portfolio of works to reach approximately 50-60 minutes of music across the two years, under the supervision of a composition lecturer. In addition, students must produce a research based paper of approximately 8,000 words placing their own work in the context of 20th/21st century music. The paper should emphasise the relevance of a wider musical context to their own work, drawing on theoretical/analytical methodologies, in a future-oriented manner.

   **Aims**
   **Dissertation**
   - To investigate a Dissertation topic appropriate to the degree focus and/or the musical background of the student
   - To complete a thorough literature review on the topic chosen
   - To present a Dissertation of 12,000-15,000 words that demonstrates an excellent, analytical process based on original research into the subject matter supported by the substantial addition of original critical comment

   **Music Technology**
   - The study of the major techniques used in Electro-Acoustic/Acousmatic Composition
   - The study and use of music technology software appropriate to said techniques
   - To gain an understanding of the historical developments in the field of Electro-Acoustic/Acousmatic Composition via critical analysis of the masterworks of the 20th and 21st century
To submit a digital media portfolio of a minimum of 25-30 minutes in length and a detailed research based written commentary of approximately 8,000 words of the artistic process involved and justification of its place within the field of EA/AC)

**Composition**
- The study of the major techniques used in Composition in the 20th and 21st centuries
- To apply these techniques to the creation of original compositions
- To submit a portfolio of a minimum of 25-30 minutes in length or original work in solo and extended groupings culminating in a total portfolio of 50-60 minutes across the 2 years of the degree
- To complete a research based paper of approximately 8,000 words, placing their own work in the context of 20th/21st century music. The paper should emphasise the relevance of a wider musical context to their own work, drawing on theoretical/analytical methodologies, in a future-oriented manner.

**Composition**
On successful completion of this module, the student will be able to:
- Demonstrate a critical understanding in handling a contemporary musical language in their musical composition
- Demonstrate a critical understanding in handling extended forms in their musical composition
- Show an advanced grasp of instrumental and ensemble writing through their musical composition
- Demonstrate confidence in interacting with players, singers and ensembles through concert performances
- Demonstrate a critical understanding of his or her creative vision in written prose, placing their own work in the context of 20th/21st century music. The paper should emphasise the relevance of a wider musical context to their own work, drawing on theoretical/analytical methodologies, in a future-oriented manner.
- Draw on theoretical/analytical methodologies to place their own work in a wider musical context.

7. **Course Content and Syllabus**

**Dissertation**
Following from year 1’s introduction to research methodology practices, year 2 progresses to the development and implementation of a research plan, submission of various parts of the Dissertation at deadlines set between the student and supervisor, several drafts of the Dissertation, oral presentation of work in progress at the postgraduate Dissertation seminar and final Dissertation submission.
When submitting the final hardbound version of the dissertation, students must also submit the final version in digital format by email to the following address: library@riam.ie. Acceptable digital formats are PDF, Microsoft Word, or Rich Text File. The digital dissertation is submitted on the understanding that it may be made available online (pdf) in a institutional research repository.

**Music Technology**

A typical Music Technology course is divided into three 10-week sessions. Each session will look at one particular topic in-depth with an assignment and commentary to follow. Topics covered have ranged from Synthesis Design via Reaktor/Absynth, Composition for Multi-Channel Speaker Array, Sound Design and Foley for Film, Composition through Field Recording through Live Electronic Processing via MaxMSP, Interactive Installation Design and Composition for Mixed-Media. The commentary must identify and reflect on the individual contribution made to the practice and scholarship of music as expressed through Music Technology.

Content is the subject to change due to the acquisition and continual release of new software packages and emerging artistic trends in the industry.

**Composition**

A folio of works which will usually be five in number but allowance is made for size and scope of individual projects. A student who wished to write a symphony or opera, for example, would carry a reduced requirement for the remainder of the folio. A written commentary of 8,000 words dealing with technical and aesthetic aspects of the folio. The commentary must identify and reflect on the individual contribution made to the practice and scholarship of music as expressed through Composition.

8. **Teaching and Learning Methods**

**Dissertation**

Individual support on all elements of the course content described above provided by the primary supervisor. Research methodology sessions provided by the RIAM librarian.

**Music Technology**

Three topics are covered over three 10-week segments:

- The first week will typically introduce students to the area of study through the use of historical and contemporary examples from leading figures in the field.
- Weeks 2-8 (approximately) will deal with the software packages required to complete an assignment in the topic of study.
- These classes are a mixture of step-by-step instruction and tutorial-based activities designed to familiarise students with the software and the aesthetic discipline of the subject.
- Weeks 8-10 (approximately) are tutorial weeks where students begin work on their assignment and may present work in progress for initial feedback or request particular clarification of certain principles.

**Composition**

Teaching is by individual tutorial. Work in progress is continuously assessed and feedback given. In addition, students are invited to take part in workshops by RIAM students and visiting ensembles--and the Kirkos Ensemble.

9. **Required Equipment and Resources**

**Dissertation**

It is advisable, though not mandatory, that each student have access to their own computer. Students will also need to speak with RIAM librarians regarding obtaining documentation for access to other University libraries as needed.

Graduate students who require an extension on the submission date of their dissertation (on medical or ad misericordiam grounds) must contact their Course Coordinator/Director prior to the submission date and must provide documentary evidence to support their case. Such extensions will be at the discretion of the course committee. Where a course requires graduate students to undertake an oral examination of the dissertation work, this will take place before the examination board meeting takes place. Dissertations may be graded fail/pass/pass with distinction. Graduate students who have achieved a pass / pass with distinction for their dissertation may, subject to the approval of the course committee, be granted a one-month extension free of fees for minor revisions / corrections prior to submitting the final hardbound copy of the dissertation. No extensions to this period will be permitted.

Where failure of a dissertation is contemplated and an oral examination has not been held as a matter of course, graduate students are entitled to an oral examination. This must take place prior to, or during the examination board meeting. The candidate must be informed of the reason for the oral examination. Candidates who have attended an oral examination as a matter of course may not avail of another. The format of an oral examination is at the discretion of the course committee.

   **Improvisation**
   Students are given note rows and rhythms as building blocks for learning to make music away from the score across a range of genres. Students will be encouraged to improvise as soloists and in groups.

   **Performance Psychology**
   This section of Professional Practice focuses on the psychology of performance. It aims to raise awareness of the necessity for emotional and mental well-being in the quest to reach peak performance.

   **Career Strategy**

RIAM Philharmonia  
**Director – James Cavanagh, head of Performing Groups**  
The RIAM Philharmonia is a newly formed 3rd level only orchestra, which explores repertoire of the 18th, 19th and 20th centuries in intensive, week long rehearsal and performance sessions. Various international guest conductors work with the group and the music performed relates to their specialism. At times the RIAM Philharmonia works in other eras through its sub-groups, the RIAM Early Music Group (specialising in 17th and early 18th century music) and the RIAM new Music Ensemble (performing works from the 21st century).

RIAM Chorale  
**Conductor - Blánaid Murphy**  
The RIAM Chorale consists of 50 singers, all of whom are students of the Academy, and its repertoire spans the sixteenth to the twentieth centuries, ranging from madrigals and motets to oratorios and operas. Emphasis is placed on the student's ability to sing at sight, and the development of a sense of ensemble. Membership is open to students whose Principal Study is not necessarily singing but who demonstrate a high degree of musicianship. Members of the choir and senior singing students are given the opportunity to perform as soloists in the concerts which the choir gives throughout the year. The Chorale has performed on RTE radio and television and at many venues around the country.

**Song Classes (Lieder, French Mélodies, English and American Song)**  
**Tutors - Kathleen Tynan / Mary Brennan / Virginia Kerr**  
These classes take you on a voyage of discovery through the many faceted realms of art song. From the highs and lows of the German Lied, to the ecstatic charm of the French Mélodie, trips to the American continent, Great Britain and occasional forays even further afield! With a lifelong love of song, not to mention a huge experience of performing recital repertoire, each tutor will entice you with the wonderful poetry, which inspired these songwriters to produce such magical creations. On your journey you will deal with language, historical context and appropriate stylistic vocal response together with performance techniques. All of this will instill in students an in-depth appreciation of this sometimes neglected area of vocal repertoire.

**Aria Class**  
**Tutor - Virginia Kerr**  
An exploration of operatic recitative and arias. These classes will cover the interpretation of operatic recitatives and arias already prepared by the students, and an introduction to wider repertoire as appropriate to each singer. Classes are tailored to the individual needs and development rates of the students with attention to performance details such as posture, presentation, clarity of text, communication, and stage technique incorporated in these classes. Oratorio arias can also be presented in this class. For most singers, performing as soloist in front of a choir is their first platform and is the usual route into the profession. Singers will be encouraged to learn the necessary core repertoire of works for their voice and explore the importance of musicianship and presentation.

**RIAM Opera**  
**Tutor - Kathleen Tynan**  
The RIAM produces a fully staged annual Opera production and a programme of Opera Briefs each year. Roles are assigned by audition only. Students are prepared musically by vocal coaches and conductors from within the RIAM. The director and creative/production team are drawn from the opera profession. Operas presented in recent years include: Mozart - *Die Zauberflöte* (2016); Puccini – *Suor Angelica* (2015); Cavalli – *Ormindo* (2015); Janáček – *The Cunning Little Vixen* (2014); Britten – *Albert Herring* (2013); Handel – *Semele* (2012).

**Conducting**  
**Conductor - Gavin Maloney**  
This elective delivers insight into practical matters such as the difference between choral and orchestral conducting, rehearsal technique and accompaniment of solo performers. Elements studied will consist of basic conducting techniques with and without baton. All common time signatures will be studied as well as relevant musical styles. Tempo, dynamics and articulation will also be addressed.

**RIAM Chamber Orchestra**  
**Guest Conductors**  
Regarded as one of Ireland's most exciting young ensembles, the Royal Irish Academy of Music Chamber Orchestra was founded in 1997. Bringing together some of the Academy’s finest string players, the Orchestra usually performs standing up without a conductor and soloists are generally drawn from within the Orchestra. Its wide-ranging repertoire of music has been heard in some of Ireland’s finest performances spaces in addition to concert halls in France, the United States, Korea, China and Japan.
The RIAM Wind Ensemble
Director - Fergus O’Carroll
Victor Malirsh formed the RIAM Concert Band [formerly RIAM Wind Ensemble] in September 1994. The concept of the Senior Concert Band is one of the fastest growing developments in music worldwide, with an enormous outpouring of original compositions for the idioms in recent times. The RIAM Senior Concert Band at the Academy provides all wind, brass and percussion students with the experience of this new and exciting repertoire. Rehearsals take place once a week during the Academic Year under its director Fergus O’Carroll.

RIAM Jazz Band
Founded in 2000 by an enthusiastic group of classical musicians wishing to explore the medium of jazz, the Royal Irish Academy of Music Jazz Ensemble has firmly established itself as one of the most exciting groups of young musicians championing this exhilarating medium in Ireland. Ranging in age from fifteen to twenty-five, the twenty-strong Ensemble comprises musicians from all over Ireland who meet weekly. Since its highly acclaimed début performance at the National Concert Hall in November 2000, the Ensemble has performed in concert at the National Gallery of Ireland, Dublin Castle, The Helix, as well as in a number of theatres around the country. An exciting collaboration with one of Ireland’s finest pianists, Thérèse Fahy, saw the group perform Gershwin’s Rhapsody in Blue in its original form throughout Ireland. The Ensemble once again joined forces with this dynamic pianist in a new concerto for piano and jazz ensemble by Conor Linehan. Commissioned by the RIAM and funded by the Arts Council of Ireland, this new work received its world première at the National Concert Hall and toured New York.

RIAM Percussion Ensemble
Director - Richard O’Donnell
Under the directorship of the National Symphony Orchestra’s Principal Percussionist, Richard O’Donnell, the RIAM Percussion Ensemble is one of Ireland’s leading exponents of music for the medium. It has a strong commitment to presenting contemporary music to a wide audience in venues from Dublin’s National Concert Hall to The Helix, as well as other leading venues around the country. The Ensemble has also broadcast on lyric fm. In addition to an annual exchange programme with the Brooklyn College of Music in New York, the Ensemble has also travelled to Spain and South America to participate in international music festivals. Future plans include a return visit to New York and a series of concerts at The Helix in Dublin.

GuitaRIAM
Director - Marion Hyland
The Royal Irish Academy of Music guitar ensemble was formed in late 2011 by its director and head of guitar studies Marion Hyland. The ensemble is made up of past and present guitar students, ranging from senior to mastes level, and many are prizewinners in the Academy and the Feis Ceoil. Its aim is to explore the possibilities of a larger guitar group and its repertoire. As the guitar is generally a solo instrument, it gives the players the opportunity to experience larger scale works and have a positive and educational musical experience. GuitaRIAM gave its first very successful performance of the ensemble version of Steve Reich’s Electric Counterpoint for the RIAM’s 2012 chamber music programme last April, followed by a performance at the Kevin Barry Room of the National Concert Hall at the invitation of the Great Music in Irish Houses Festival. The ensemble has been given the great honour of presenting the first performance of a new work by composer and guitarist Roland Dyens, commissioned by the Guitar Festival of Ireland to celebrate the tenth anniversary of the festival. So in honour of the occasion the programme will have three Roland Dyens works, all getting their first Irish Performance!

Appendix 3: Academic Elective - Research Misconduct

This is defined as but is not limited to fabrication, falsification or plagiarism in proposing, performing, or reviewing research or original compositions, or in reporting research results. All students must go to http://tcd-ie.libguides.com/plagiarism to comply with TCD instructions regarding plagiarism.

1. Fabrication

1.1 Fabrication is making up data or results and recording or reporting them.

1.2 Falsification is manipulating research materials, equipment, or processes, or changing, distorting, dishonestly misinterpreting or omitting data or results such that the research is not accurately represented in the research record.

1.3 Plagiarism is the appropriation of another person’s ideas, processes, results, or words without giving appropriate credit, or dishonest use of unacknowledged sources. Plagiarism is addressed separately in section 2.

2 Plagiarism

Plagiarism is interpreted by the Royal Irish Academy of Music as the act of presenting the work of others as one’s own work, without acknowledgement. Plagiarism is considered as academically fraudulent and an offence against college discipline. The RIAM considers plagiarism to be a major offence and subject to disciplinary procedures. It is the responsibility of the student to ensure that he/she does not commit plagiarism.

1.1 Why is plagiarism regarded as such a serious offence?

It is clearly understood that all members of the academic community use and build on the work of others. It is commonly accepted also, however, that they build on the work of others in an open and explicit manner, and with due acknowledgement. Many cases of plagiarism that arise could be avoided by following some simple guidelines:

- Any material used in a piece of work, of any form, that is not the original thought of the author should be fully referenced in the work and attributed to its source. The material should either be quoted directly or paraphrased. Either way, an explicit citation of the work referred to should be provided, in the text, in a footnote, or both. Not to do so is to commit plagiarism.
- When taking notes from any source it is very important to record the precise words or ideas that are being used and their precise sources.
- Although the Internet often offers a wider range of possibilities for researching particular themes, it also requires particular attention to be paid to the distinction between one’s own work and the work of others. Particular care should be taken to keep track of the source of the electronic information obtained from the Internet or other electronic sources and ensure that it is explicitly and correctly acknowledged.

2.2 How can plagiarism arise?

Plagiarism can arise from deliberate actions and also through careless thinking and/or methodology. The offence lies not in the attitude or intention of the perpetrator, but in the action and in its consequences. Plagiarism can arise from actions such as:

- Copying another student’s work in full or in part and presenting it as one’s own
- Submitting the same work as a peer without having sought the approval of the lecturer and without having sufficiently individualised the work
- Enlisting another person or persons to complete an assignment on the student’s behalf
- Quoting directly, without acknowledgement, from books, articles or other sources, either in printed, recorded or electronic format
- Paraphrasing, without acknowledgement, the writings of other authors.

2.3 Is information available about plagiarism?

Advice about how to avoid plagiarism is available from the librarians, lecturers, teachers and supervisors. Advice is also available about the appropriate methodology for students to use for their work.

It is the students’ responsibility to make sure their work is not used by others without acknowledgement. The student whose work is used unreferenced by another is considered an accomplice in the act of plagiarism.

3 Policy and procedure for inquiring into allegations of research misconduct

If research misconduct is suspected, there will be an informal meeting with the student, their lecturer, the Head of Faculty and the Administrative Officer [Registry] to give the student a chance to answer. The student may bring a representative from the Students’ Union with them instead of their lecturer.

If it is decided that research misconduct has been committed, they must inform the Director in writing, and include all the information about the case as well as suggestions as to how the problem can be rectified. The Director will interview the student if there is any disagreement. The Administrative Officer [Registry] shall then follow the following steps e.g. the student shall be returned as Fail by the Board of Examiners and shall be required to re-
submit work as determined by the Board of Examiners. The grade of the second attempt allowed shall not exceed 40%.

Only those directly involved in the inquiry should be aware that the process is being conducted or have access to any information during the course of the investigation.
